

## Filigree Practice

Below are four common filigrees used to decorate petits fours glace. Start by tracing the images starting with the leftmost image and progressing to the complete filigree design. You need to be able to do this without lifting your pencil since when you pipe chocolate stopping in the middle of piping can create a blob in the middle of your filigree. Music symbols are great for piping chocolate. Try googling filigrees or chocolate designs for more inspiration! Remember that tempered chocolate will always pipe better, thinner, more graceful designs than coating chocolate.
